**Dr. Keri Chiappino Announces '08 Presentation Slate
for Hemispheric Imbalances Associated
with Autism and Learning Disorders**

*Workshops Shed Light on Basis of Brain Imbalances and On
Effective, Holistic, "No Meds" Therapy Options*

FOR IMMEDIATE RELEASE

Smithtown, NY (January 14, 2008) – Chiropractic Neurologist Dr. Keri Chiappino announced today her upcoming schedule of presentations aimed at helping parents of children with hemispheric imbalances better understand the neurological basis for their child's condition. The workshops specifically address non-pharmacological therapy options for Autism Spectrum Disorders (ASD) including Asperger's Syndrome, as well as Attention Deficit Disorder/Hyperactivity Disorder (ADD/ADHD), Tourette's Syndrome, Dyslexia, and other learning disabilities.

According to Dr. Chiappino, "Parents are often overwhelmed by the myriad of therapies recommended for their children. Many times medication is the only treatment method that is offered to treat their child's symptoms. Medication controls symptoms without getting to the root of the problem. If the brain has reduced metabolic rates, medication will increase them, but if you remove the medication, the problem will return. By far, the majority of children and adults do very well without a stimulant medication if the patient is under the care of a Chiropractic Neurologist trained to improve the imbalances that are apparent in these conditions. The presentations I am offering are in a sense awareness workshops designed to educate parents on the cause of their child's disability and how neurological balance can be restored -- without resorting to medication."

The free workshop series is conducted monthly on Monday evenings from 7:15 – 8:00 pm at Dr. Chiappino's Smithtown office 323 Middle Country Road, Smithtown. Kicking off the series on Monday January 14, 2008 is a presentation on ADD/ADHD. The following is the schedule for the remainder of the year:

February 11 -- Asperger's Syndrome workshop
March 10 -- Dyslexia workshop
April 14 -- Autism workshop
May 12-- Tourettes's Syndrome workshop
June 9 -- Asperger's Syndrome workshop
July 14 -- ADD/ADHD workshop
August 11 -- Tourette's Syndrome workshop
September 15 -- Autism workshop
October 13 -- Dyslexia workshop
November 3 -- ADD/ADHD workshop
December 1 -- Autism workshop

For more information or to make a reservation for one of the complimentary workshops, contact Dr. Chiappino's office at 631 265-1223. Space is limited.

About Dr. Keri Chiappino and New Life Chiropractic

Dr. Keri Chiappino offers a unique, expanded approach to alternative health care and specializes in neurological disorders in children, particularly those with Autism Spectrum Disorders, Asperger's Syndrome, ADD/ADHD, and other learning disabilities. Utilizing non-invasive therapies that comprise her unique "Maximum Achievement Program," Dr. Chiappino has been successful in improving brain functionality in her patients with ASD, enabling them to perform at their full potential.

Dr. Chiappino has distinguished herself as one of 600 doctors worldwide achieving Diplomatic status on the American Chiropractic Neurological Board (ACNB), with over 1000 hours in chiropractic neurological coursework. She is one of only a half dozen active and certified Chiropractic Neurologists practicing in the Long Island area. Her private family practice, New Life Chiropractic, is dedicated to chronic conditions that severely disable people, including patients with Multiple Sclerosis, Parkinson's, Alzheimer's, vertigo, migraines, asthma, depression, anxiety disorders as well as learning disabilities and ASDs. Dr. Chiappino can be reached at her Smithtown, Long Island office at 631 265 1223 or at her Manhattan office at 212 721 1188; www.newlifechiropractic.com.
